BELINDA YATES

ART GUILD OF PADUCAH SUMMER IN FULL SWING!

Individual creativity gets into motion when talented artists work together to inspire each other. The Art Guild of Paducah is founded on this principle. We work together every day to bring fine art and craft to Paducah.

This month the Art Guild is featuring a collaboration show that features art made with creative teamwork.

We discovered some amazing things when these efforts resulted in more than just the sum of the parts.

Come see what happens when $1 + 1 = 3$!

Coalescence: The Art of Collaboration

ART OPENING

FRIDAY, JUNE 6, 5-7PM

This is a unique exploration of nature through shared creation. Blending diverse styles, voices, and visions, this exhibition celebrates the power of artistic unity and the beauty of the natural world through collaboration.

All new work has been created for this show and will be available for sale. Attendees of the opening will have first chance at owning a piece of unique, collaborative artwork (otherwise, available online after the opening).

The show runs through the month of June.
